Using `biblatex` you can display bibliography divided into sections, depending of citation type. Let's cite! Einstein's journal paper [1] and the Dirac's book [3] are physics related items. Next, *The L^AT_EX Companion* book [`latexcompanion`], the Donald Knuth's website [4], *The Comprehensive TeX Archive Network* (CTAN) [`ctan`] are L^AT_EX related items; but the others Donald Knuth's items [2] are dedicated to programming.
